

CLOUD SECURITY

Most enterprises store sensitive data in secure data centers or on-premise. There is a rising concern over storage and remote security management by third-party vendors. These expanding enterprises give top priority to privacy, interoperability, application portability, data integrity, business continuity, and security.

HOW WIPRO HELPS

Early adoption of cloud has its share of critical challenges Cloud Security being the biggest barrier. With Wipro's comprehensive Cloud security and compliance frameworks, tools and capabilities, your business can safely operate on the cloud and benefit from:

- Enhanced data security and privacy
